

Coding the Elements of Music

If you have a Laptop or a device please go to <https://scratch.mit.edu>
You can choose to create an account 'Join Scratch' or just select 'create' to work without an account.

If you haven't pre downloaded Scratch 3.0 onto your laptop/macbook please do not download now.

Session notes:

Content Descriptions F-2	Content Descriptions 3-4	Content Descriptions 5-6	Content Descriptions 7-8	Content Descriptions 9-10
Develop aural skills by exploring and imitating sounds, pitch and rhythm patterns using voice, movement and body percussion (ACAMUM080)	Develop aural skills by exploring, imitating and recognising elements of music including dynamics , pitch and rhythm patterns (ACAMUM084)	Explore dynamics and expression, using aural skills to identify and perform rhythm and pitch patterns (ACAMUM088)	Experiment with texture and timbre in sound sources using aural skills (ACAMUM092)	Improvise and arrange music, using aural recognition of texture, dynamics and expression to manipulate the elements of music to explore personal style in composition and performance (ACAMUM099)
General Capabilities   			Develop musical ideas, such as mood, by improvising, combining and manipulating the elements of music (ACAMUM093)	Manipulate combinations of the elements of music in a range of styles, using technology and notation (ACAMUM100)

Computational thinking

decomposition

solve a problem
by **breaking** it
into **smaller groups**

pattern
recoanition

find the **order**

analyze the data

Application of Computational Thinking in Music

Decomposition

Breaking a problem down into smaller parts.

Break down elements of a song to identify the techniques used.

Identify and extract music played by different instruments.

Identify and group instruments within an orchestra.

Pattern Recognition

Identifying similarities, trends and sequences.

Investigating song origins: identifying melodies, rifts and beats.

Identify loops within a sequence of music.

Identifying similar rifts and beats to identify different music styles.

Looking for similarities within song rifts within different pieces of music.

Abstraction

Considering the important parts.

Identify a song or a piece of music from a short extract.

Identifying different music styles from a sample of music.

Identifying the music of a specific instrument from a single.

Hum or whistle your interpretation of a song.

Algorithm Design

A sequence of instructions to complete a task.

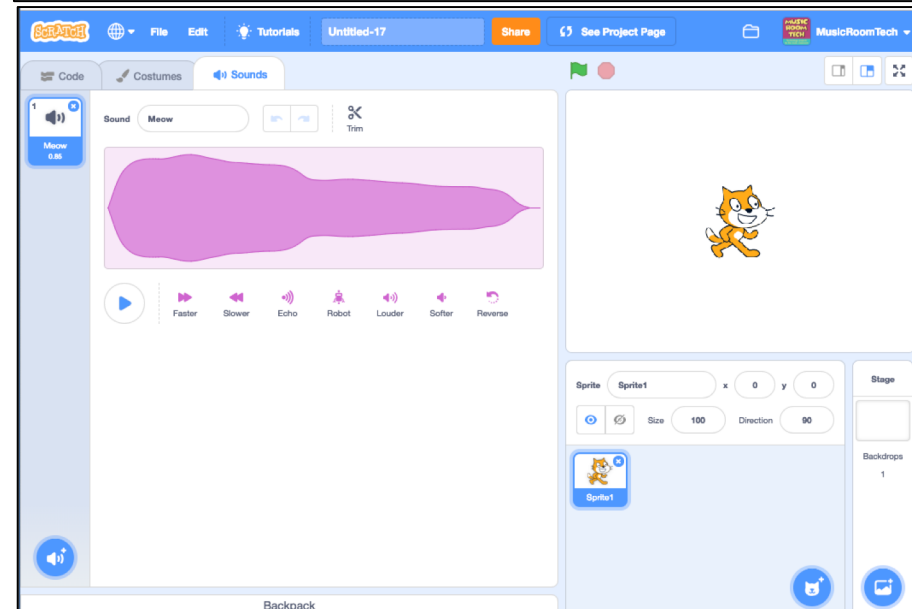

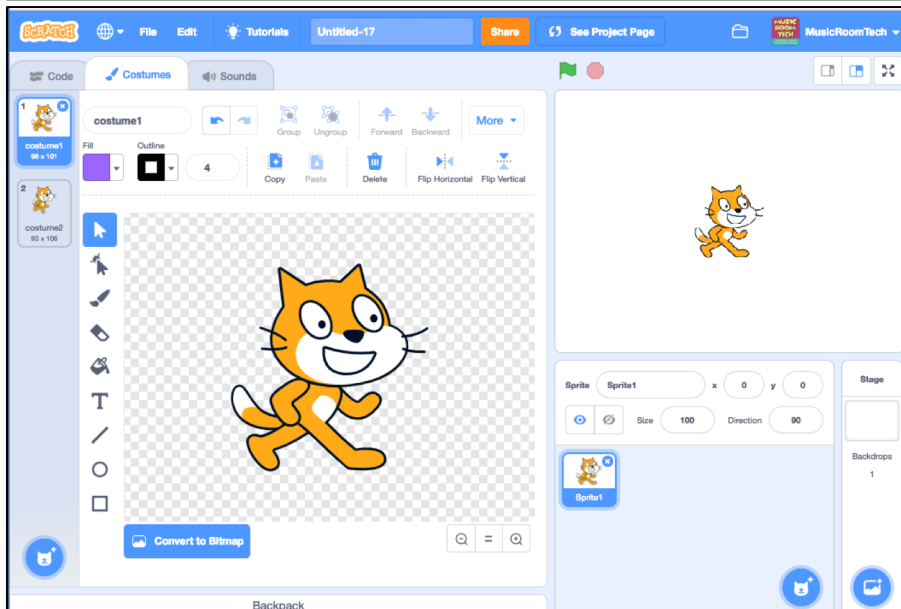

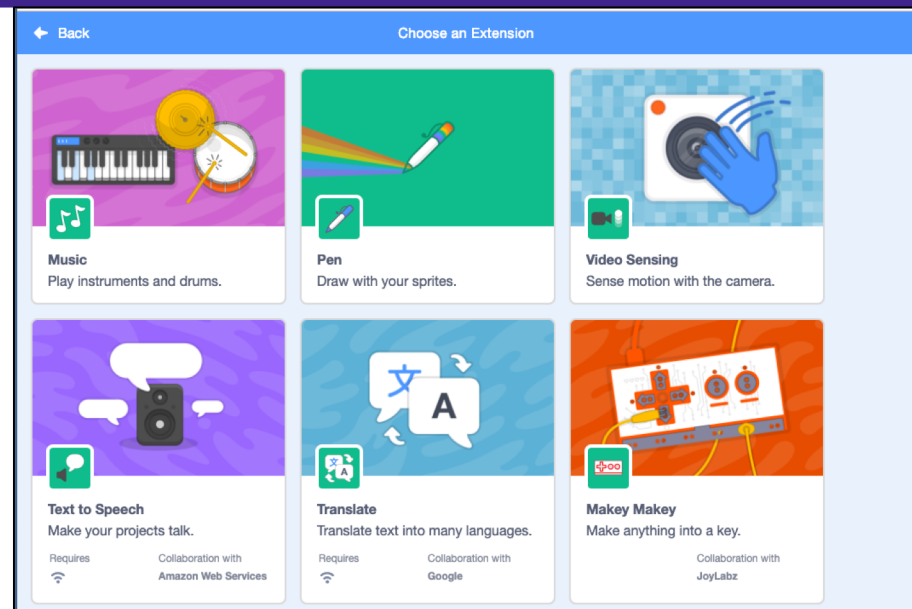

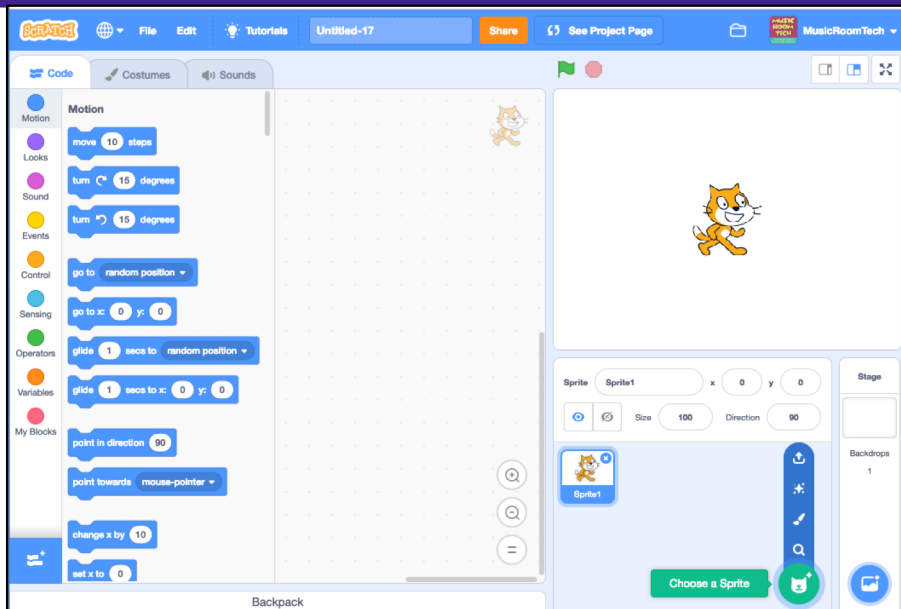

Write a piece of music.

Write the lyrics to an original song.

Teach someone else a piece of music.

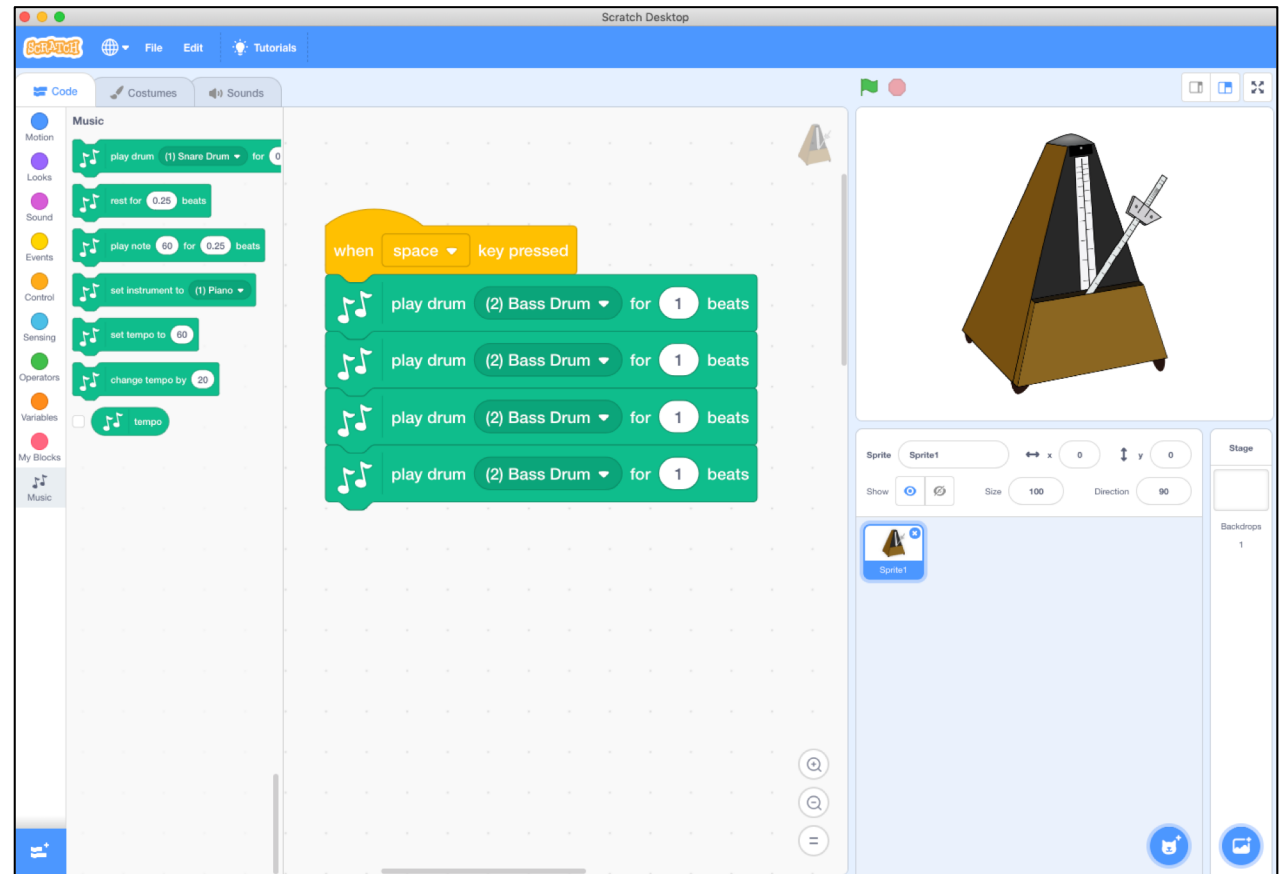

Conduct a sequence of music.

For more ideas, visit @RobbotResources

Beat:
The basic unit of
measurement
used in music, it is
described as a
pulse.

<http://www.clker.com/clipart-metronome.html>

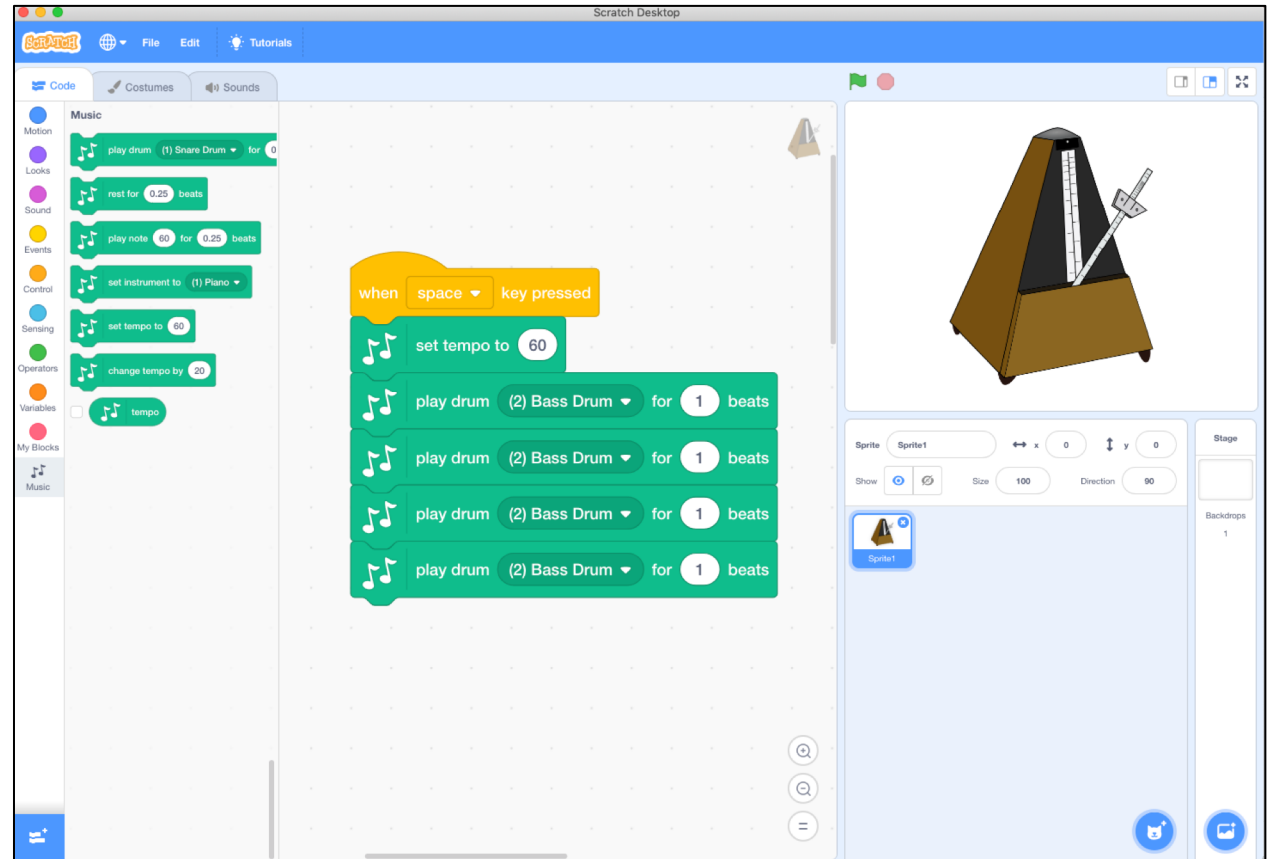

Tempo:

How fast or slow
the beat is played
using the
measurement of
time – bpm

The number of
Beats Per Minute

Set tempo to

- 60
- 90
- 120

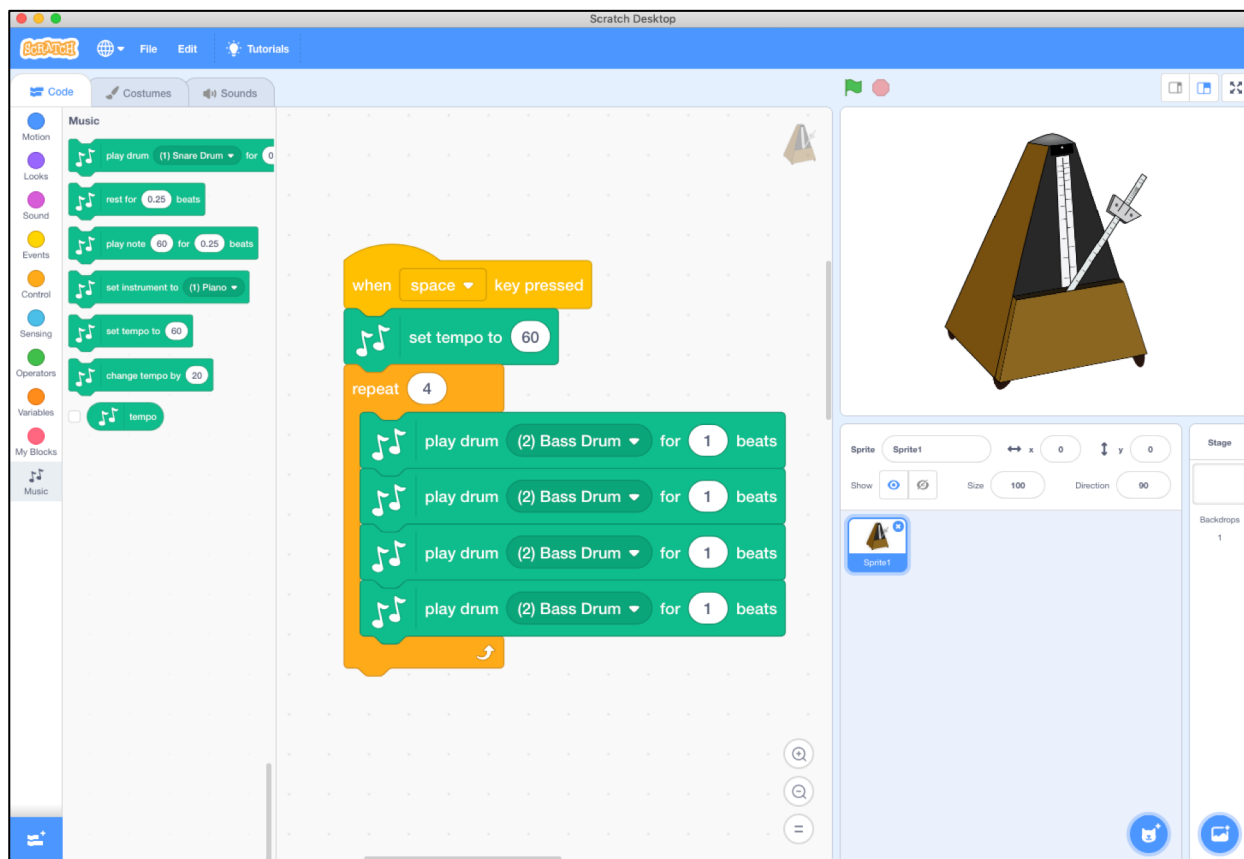

<http://www.clker.com/clipart-metronome.html>

Set tempo to

- 60
- 90
- 120

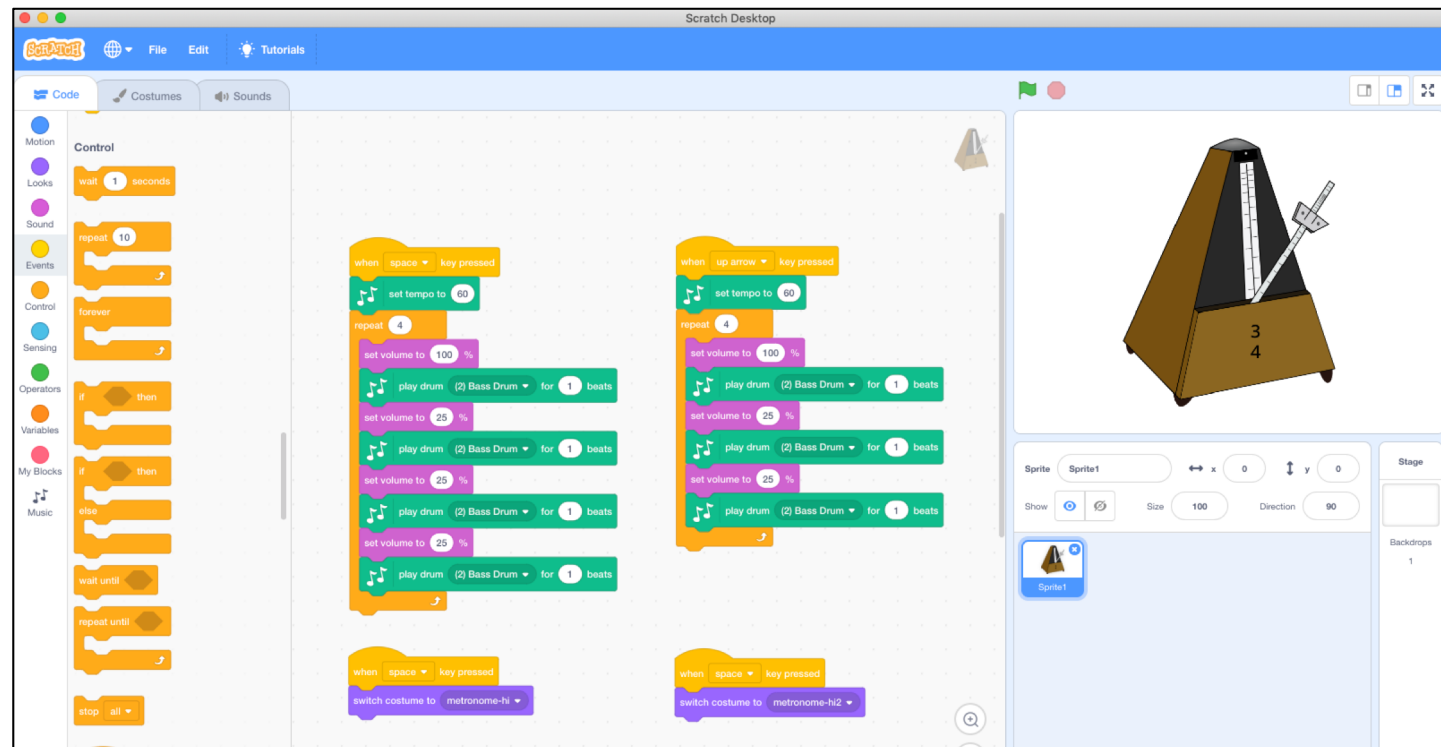

<http://www.clker.com/clipart-metronome.html>

Set tempo to

- 60
- 90
- 120

To show the
Accented beat
set the volume
before each
block

<http://www.clker.com/clipart-metronome.html>

1

1

1

1

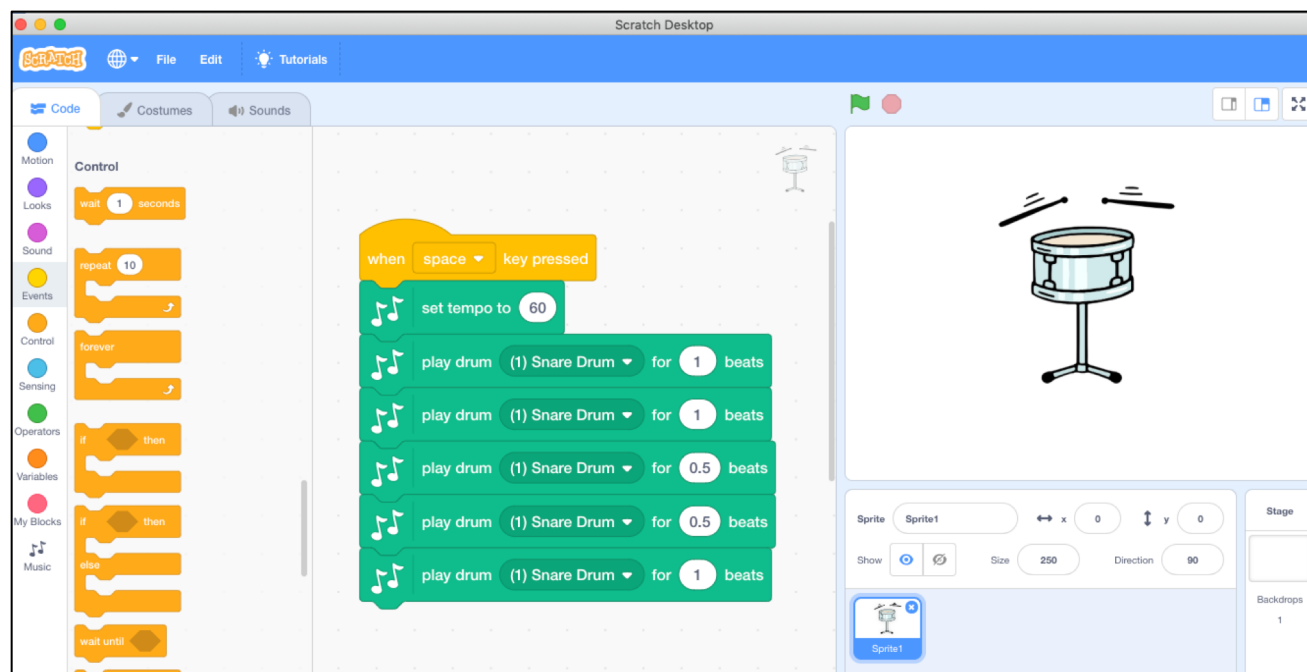

$$\frac{1}{2} + \frac{1}{2}$$

$$0.5 + 0.5$$

1

1

Rhythm:
Combinations of
long and short
sounds and rests
that are made by
multiplying or
dividing a beat
using equal parts
(equivalent
fractions)

1
1

1
1

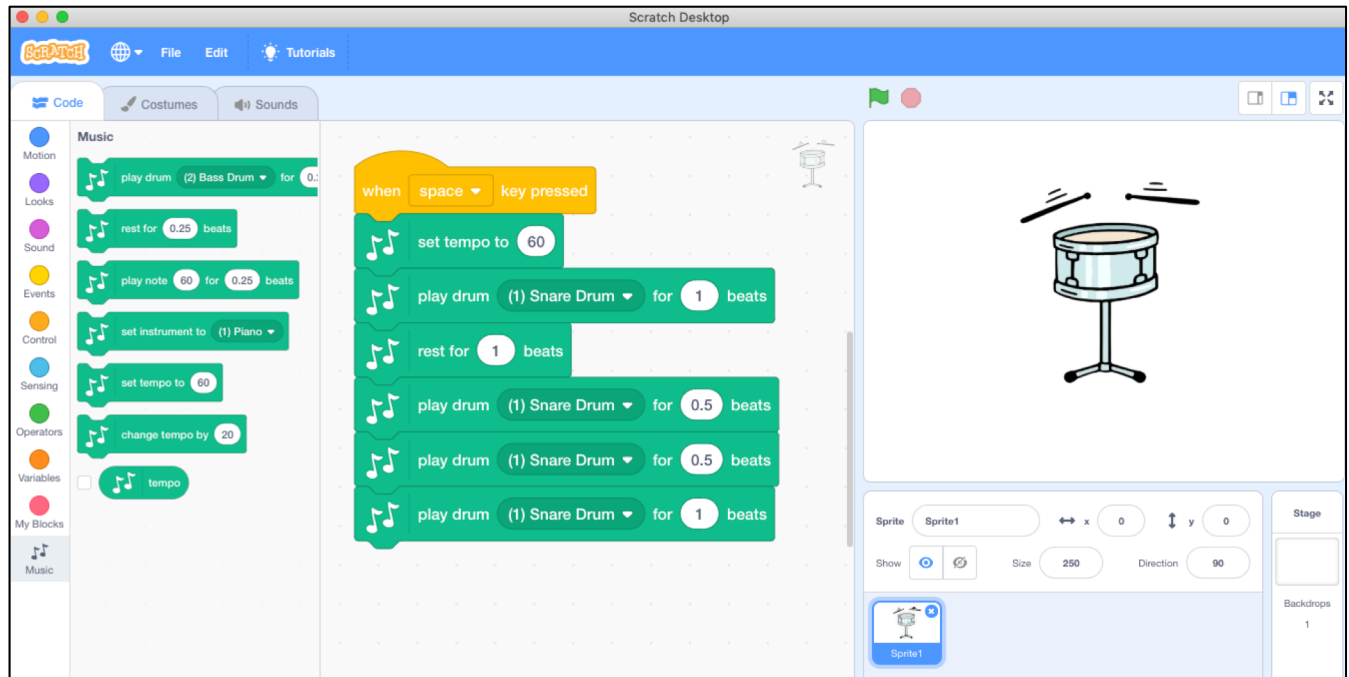

$\frac{1}{2} + \frac{1}{2}$
0.5 + 0.5

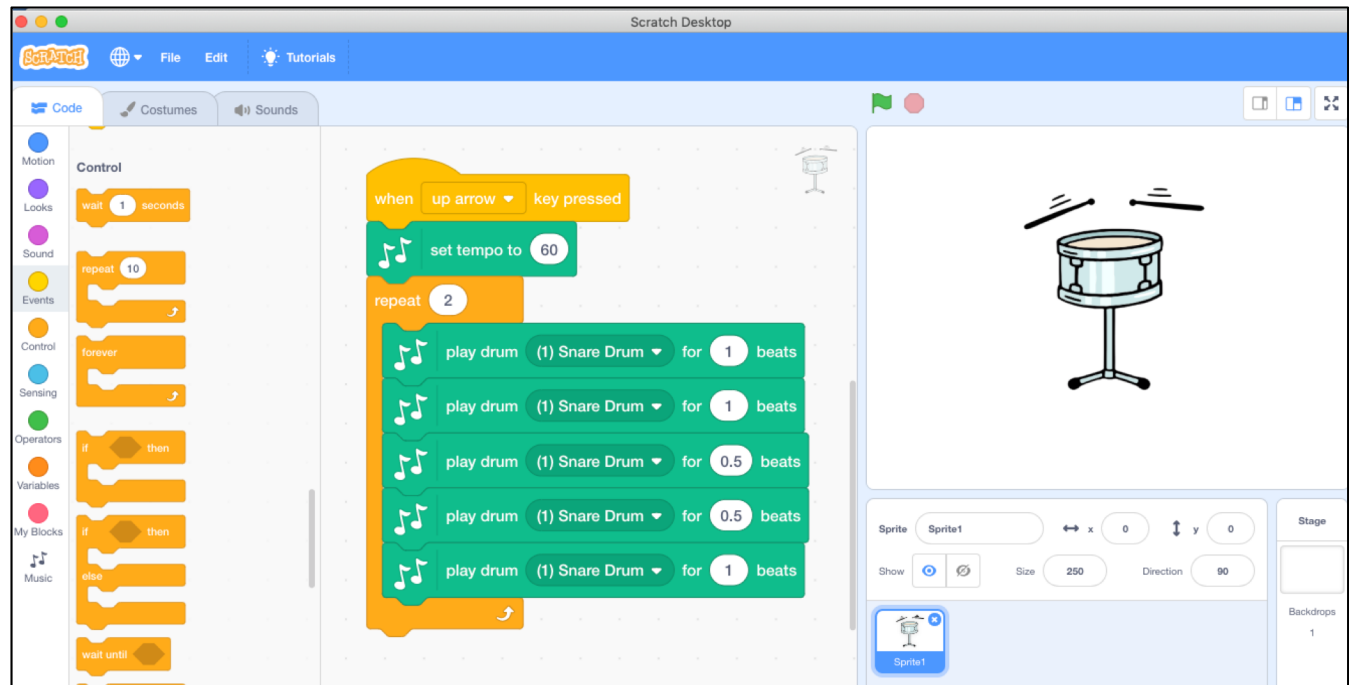

1
1

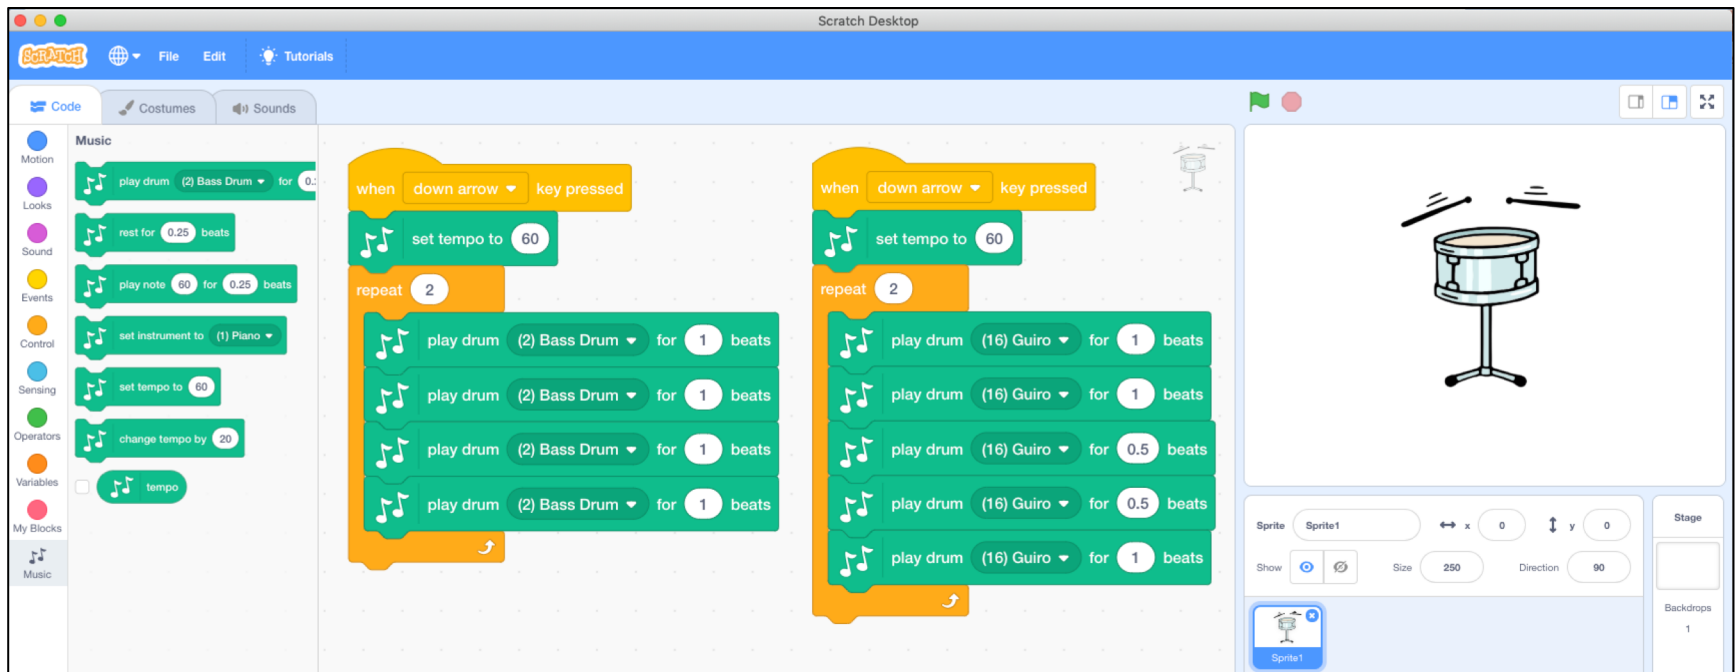

Rhythm:
Combinations of
long and short
sounds and rests
that are made by
multiplying or
dividing a beat
using equal parts
(equivalent
fractions)

Repeat Bar:
Repeat the
pattern 2
times unless
number of
repeats is
stated

Rain, rain, go a - way, come a - gain a - no - ther day

Pitch:

the highness or lowness of a sound
Numbers are higher and lower so
pitch in music on a computer is
represented by how high (large) or
low (small) the number is.

Transposition: Change the numbers to
be higher by 1 number – this
increases it by a semitone.

FYI: Mathematical numbers refer to
midi notes in computer language.
Middle C is the 60th note on the piano,
it's midi number is 60.

High note = 65 (F)

Low note = 62 (D)

High note = 66 (G)

Low note = 63 (E)

when space key pressed

- set tempo to 60
- play note 65 for 1 beats
- play note 62 for 1 beats
- play note 65 for 0.5 beats
- play note 65 for 0.5 beats
- play note 62 for 1 beats
- play note 65 for 0.5 beats
- play note 65 for 0.5 beats
- play note 62 for 0.5 beats
- play note 62 for 0.5 beats
- play note 65 for 0.5 beats
- play note 65 for 0.5 beats
- play note 62 for 1 beats

when space key pressed

- set tempo to 60
- play note 66 for 1 beats
- play note 63 for 1 beats
- play note 66 for 0.5 beats
- play note 66 for 0.5 beats
- play note 63 for 1 beats
- play note 66 for 0.5 beats
- play note 66 for 0.5 beats
- play note 63 for 0.5 beats
- play note 63 for 0.5 beats
- play note 66 for 0.5 beats
- play note 66 for 0.5 beats
- play note 63 for 1 beats
